

Senate faces broad range of issues

First meeting today

by Kevin Clark
Daily Aztec staff writer

When the University Senate meets today for its first meeting of the academic year, one thing will be sure: there will not be a shortage of issues affecting the university, students and faculty.

Albert Johnson, vice president for Academic Affairs, set the tone for issues to be debated this year when he presented the Senate with a list of 10 issues that are likely to concern the Senate, not only this year, but for the next five to 10 years.

Among the most pertinent issues presented last May were the role of the university in providing literacy and remedial education, impending budget problems, and attracting and retaining faculty with competitive salaries.

Other issues include the advising and retention of students, shortages of classroom and office space, and an overabundance of academic programs, Johnson said.

The issue of literacy and remedial education is important because these programs affect half of incoming students in the areas of math and English.

Johnson said that these programs consume teaching resources as well as student time.

"The literacy and remedial education problem is not one that is specific to this university," Johnson said. "It's a national problem."

Please see ISSUES on page 3.

by Kevin Clark
Daily Aztec staff writer

Faculty and student representatives working together on the University Senate for quality education is what Associated Students President Chris Wakeman would like to see happen this year.

The University Senate, comprising about 80 representatives from the faculty, administrators and four student representatives, recommends actions to SDSU President Thomas Day for approval and inclusion in the university policy file.

The student representatives are advocates to the faculty and include Wakeman, Mike Karney, Steve Turchen, and representative-elect Linda Grant.

Wakeman said some of the most important issues likely to be considered by the Senate this year include: a proposal to shorten the drop period from three weeks to two weeks; a proposal to eliminate or reorganize remedial education on campus; and budget problems that could threaten the quality of education at SDSU.

The add/drop issue is the foremost concern for the A.S. in the Senate at this time, Wakeman said. Although the Senate in May approved changing the drop period from three weeks to two weeks, Day rejected the recommendation on the grounds that students did not get adequate notice and didn't have adequate time to take a stand on the proposal.

Karney, who has been working on the issue, said a shortening of the drop period would only cause more problems for students.

Please see A.S. on page 6.

County selects Campanile site for bus station

by Julie Brenner
Daily Aztec staff writer

After nine months of studies and negotiations, the County approved plans to spend \$1,750,000 to level the Wesley Foundation to accommodate a new San Diego Transit bus terminal.

Officials considered 19 locations before choosing the site on Campanile Drive.

Tim Price, Transit Planner/Program developer, said, "Campus planners, ASB & the community are very supportive of the plan."

The Wesley Foundation agreed to relocate at 5716 Hardy Ave. and will move into a private dorm that was purchased by the County with plans for renovation.

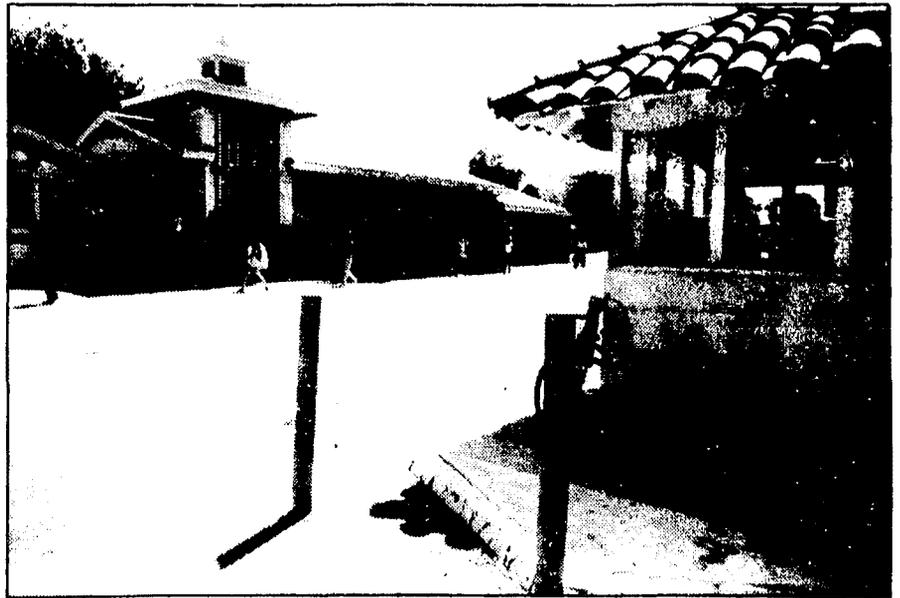

Chuck Johnson, director of SDSU

Facilities Planning and Management, said the County also plans to purchase and remove the apartments adjacent to the Wesley Foundation and will remove all metered parking along Campanile Drive. There are no plans to relocate the apartments.

A new site for the public safety information booth hasn't been selected. However, Johnson believes it will be put off Campanile Drive somewhere between Lindo Pasco and Hardy Avenue.

Although the terminal will prohibit vehicular traffic, Price said, "The site allows maximum accessibility to the SDSU campus to encourage faculty, staff and student use of the bus."

Please see TERMINAL on page 10.

Daily Aztec photo by Tom Rigger

BEHIND THE EIGHT-BALL—The public safety information booth and the Wesley Foundation will both be leveled to make room for a new rapid transit center. The Wesley Foundation will be relocated down the street.

Council restricts parking along Montezuma Road

Parking will be prohibited on Montezuma Road west of 55th St. the San Diego City Council decided unanimously Monday.

In addition, parking along 55th St., Remington Road and Fairmont Avenue from Montezuma Road to Interstate 8 will be prohibited.

The council also approved CalTrans construction of bike lanes and spot road-improvement work along

much of the same route.

John Kern, City Councilman Dick Murphy's assistant, said that Murphy believes the parking prohibition is "an important step" in solving traffic problems in the area. Murphy represents the SDSU area.

Although no exact date for the parking prohibition was immediately known, construction of the bike lanes could start a month from now, a city

spokesman said.

The prohibition's impact is also not known. SDSU Transportation and Facilities Planner Larry Piper said last week that 35 spaces could be lost. He pointed out that 80 spaces were gained in this summer's renovation of SDSU parking lots.

However, students without parking permits could be affected by the loss of these spaces.

Power loss disrupts classes; computer damage possible

by Colleen Kapalla
Daily Aztec staff writer

A power outage Monday disrupted classes, left West Commons employees scrambling to save food and may have damaged campus computers, SDSU sources said.

At 12:42 p.m., the West Commons, which also houses the Social Science Research Laboratory, lost partial power. At 1:33 p.m., power was completely lost there, in the Industrial Arts Building and in the Art Building. The Administration Building lost partial power, and the Peterson Gym women's locker room was also affected, said Joe Stahley, work control coordinator for the Physical Plant.

"We had feeder No. 7 blow up in the manhole," Stahley said. "It was probably caused by a combination

of the heat and a deteriorated splice."

Repair crews began work immediately but estimated that the power would be out for two hours.

Marty Cooper, a West Commons cashier, was ringing up purchases when the first outage occurred.

"We had a pretty big rush in here," Cooper said. "We were able to keep cooking hamburgers, but weren't able to provide french fries or drinks to go with them."

The ranges are fueled by gas, but the french-fry machine and tap drinks are electrically operated. Workers cooked by lantern light.

Many students don't like canned drinks or milk, which remained available, Cooper said.

"Rather than give half-ass service, we just closed," Cooper said.

3 Marines hurt by mortar fire

BEIRUT, Lebanon (AP)—Mortar shells slammed into U.S. Marine positions at the Beirut airport Monday night, wounding three of the American peacekeepers. A Marine spokesman said.

Maj. Robert Jordan said two of the wounded were evacuated to the helicopter carrier Iwo Jima anchored offshore. One suffered a shrapnel wound in the left hand and the other had a dislocated shoulder, he said.

The third Marine was treated on the compound for a minor shrapnel wound in the leg, he said. Jordan refused to speculate about who fired the mortars, but both Shiite Moslem

militias and leftist Druse militias hold positions that would be in range.

NATION

U.S. expels two Soviet diplomats

WASHINGTON (AP)—The State Department disclosed Monday that two Soviet diplomats were expelled from the United States last month as alleged spies.

The two Soviets were identified as Yuri Petrovich Leonov, an assistant air attache at the embassy here, and Anatoly Yevgenyevich Skripko, another attache at the embassy. Both were declared persona non grata "for engaging in espionage," said Alan Romberg, a State Department spokesman.

Skripko was declared persona non

grata on Aug. 17. The action against Leonov was taken two days later.

A State Department official, who spoke only on condition that he not be identified, said the decision to announce the expulsions was made because the Soviets disclosed the expulsion of a U.S. diplomat, Lon David Augustenborg, on spying charges.

Augustenborg was vice consul at the U.S. Consulate in Leningrad. His wife, Denise, also was declared persona non grata.

Also, the expulsions of the two Soviet envoys preceded the Soviet downing of a South Korean airliner carrying 269 people on Sept. 1, which has caused a serious deterioration of Soviet-American relations and prompted worldwide criticism of the Soviet Union.

Romberg said the United States is "vigorously protesting the physical mistreatment" of Augustenborg. He refused to elaborate on the matter and went no further than to say that Augustenborg was a junior officer at the

consulate.

The U.S. official who spoke on condition that he remain anonymous said Skripko was caught handing money to someone for a classified document he had just received.

Another official said the other person, whose identity was unknown to Skripko, was an agent of the FBI, which had entered the case "at an early stage."

Leonov was said to have been apprehended carrying a briefcase containing classified documents.

One official said Leonov was the same diplomat who attempted in September 1981 to obtain information on MX missile deployment plans from Rep. David F. Emery, R-Maine.

The official said Leonov left the country temporarily after the Emery incident but later returned.

STATE

Group works toward peace

SAN FRANCISCO (AP)—A 55-year-old Santa Cruz contractor with five children is among a nine-member Peace Brigades International team that left Monday for the Nicaraguan-Honduran border to push for nonviolent settlement of Central American strife.

Jack Schultz, field coordinator for the group, noted the village they plan to visit has been under repeated attack by Nicaraguan rebel forces and said, "I agree we are putting ourselves in a precarious position."

"I have five children and discussed the trip with them. They are frightened. But they agreed that I must go there. We'll just have to be careful."

Schultz said the project has three primary objectives.

The team wants to focus international attention on the "escalating violence in the border region. Secondly, we offer active nonviolence as an effective means for international peacekeeping. And lastly, we go to learn from all parties involved."

The four men and five women on the team range in age from 25 to 67 and have a variety of skills. Among them are a teacher, a commercial diver and a musician. All are from Santa Cruz except one, who is from Albany, Calif.

Betsy Fairbanks, of the Central America Project Committee and a member of the support group, said the team will undergo orientation in Mexico City and expects to arrive at Jalapa, Nicaragua, a few miles south of the border, on Friday. They expect to return home in a little over two weeks.

California sears in record heat

LOS ANGELES (AP)—California cooked and Los Angeles stank of smog another day Monday as a heat wave that routed a million people to

the beaches over the weekend showed no signs of easing this week.

While a hint of fall was beginning to be felt in much of the country, Los Angeles tied a 105-year-old temperature record Sunday, registering 101 degrees on thermometers downtown. It was also 101 in Sacramento.

In San Francisco, the U.S. Park Service reported its busiest day of the season Sunday. Thousands of others fled 101-degree temperatures at nearby Stinson Beach, where park ranger Terry Swift said traffic on Highway 1 was such that it "took 20 minutes to drive a mile into town."

Southern California Edison Co. and the Los Angeles Department of Water and Power attributed sporadic blackouts to overloaded electrical transformers.

About 2,000 customers were without lights, fans or air conditioners for varying times on Sunday.

Temperatures should hover between 95 and 105 through Friday, said Stan Massey of the National Weather Service office in Los Angeles.

SPORTS

Martina shooting for perfect year

NEW YORK (AP)—Now that the U.S. Open singles championship is hers, Martina Navratilova admits there are more mountains to climb.

"The Grand Slam is definitely in my mind," she said Monday, basking in the glory of her first singles title at America's premier tennis tournament. "The Australian Open is the next big stepping stone."

Then there's the biggest mountain of all, one even she feels she cannot climb.

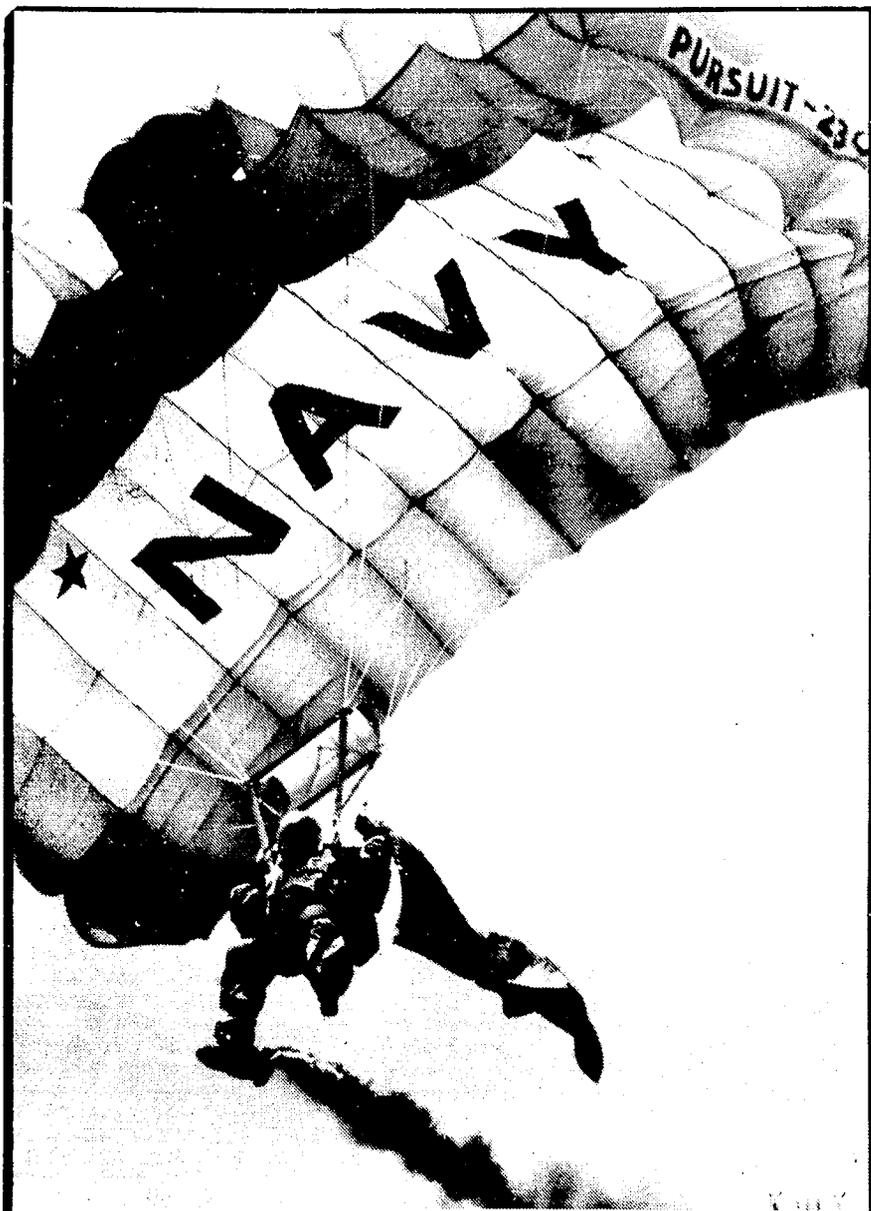

"One goal would be to go the entire year without losing," she said, a big grin spreading across her face from just the thought of the challenge. "I probably would retire if I had a year like that. It's a good thing Kathy (Jordan) won at Paris or I might be retiring after this year."

Jordan upset Navratilova in the French Open in May, handing the left-hander her only loss of 1983. Since January 1982, she has won every tournament she has entered except four and has reached the finals in those, with the exception of this year's French Open, while posting a phenomenal 156-4 record.

U.S. calls Aussie radical keel trick

NEWPORT, R.I. (AP)—A key member of Liberty's crew claimed Monday that Australia II's radical keel was a "trick" that should not be permitted in the America's Cup finals that begin Tuesday.

The Aussies downplayed the accusation, and syndicate head Alan Bond exuded confidence that he would fulfill his "magnificent obsession" with breaking America's 132-year stranglehold on the cup.

Calendar

• **Calendar** is a public service provided by the *Daily Aztec*. To announce events, SDSU organizations should follow these directions.
• Entries must be submitted no earlier than three and no later than two days prior to publication. Deadline is 8 a.m. Forms submitted more than three days in advance will be discarded.
• Forms are available in the *Daily Aztec* office, PSFA-361. No entries will be accepted by telephone.
• Space limitations preclude print guarantees. The editor also reserves the right to refuse any entry.
• Events should be open and of general interest to the student body.

• For more information, contact Sandy Mazza, 265-6975.

Today

- **College of Arts & Letters** Grassroots Council will meet in SS 135A at 4 p.m.
- **American Society of Mechanical Engineers/Automotive Engineers** will meet in E-328 at 11 a.m.
- **Geography Association** will meet in

SS-243 at 3 p.m.

- **Horizon Christian Fellowship** will meet in Aztec Center rooms C & F at 7 p.m.
- **M.E.Ch.A.** will meet in the Newman Center at 5 p.m.
- **Recreation Majors Assoc.** will meet in PSFA-436 at 1 p.m.
- **Political Science Club** will meet in Scripps Cottage at 3:30 p.m.
- **Student Mentor Program** will have an

orientation meeting in Montezuma Hall at 3 p.m.

- **Lacrosse Club** will meet in the Aztec Center rooms L & M at 3 p.m.
- **Campus Crusade for Christ** will meet in Casa Real at 7 p.m.
- **Cycling Club** will meet in Aztec Center rooms D & E at 7 p.m.
- **Art Faculty Annual Exhibition** will be featured in the University Gallery from noon to 4 p.m.

Faculty voice focused in Senate

(Editor's note: Parts of the following are a condensation of the university policy file regarding the University Senate structure.)

by Kevin Clark
Daily Aztec staff writer

The elimination of remedial education, resolution of budget problems and whether faculty and administrative salaries remain competitive may hinge on advice by the Uni-

versity Senate to President Thomas Day this academic year.

The Senate, which draws input from a campus-wide base, will consider including these matters that affect the university not only for the current year, but possibly for the next five to 10 years.

The Senate serves as the faculty delegate assembly through which the faculty exercises its power. The Senate acts for the faculty on all matters that are within its scope.

Its duties include reviewing established policies, considering new policies and studying matters of concern to students or faculty. It is also responsible for formulation of educational policy, such as admissions,

curricula and criteria used for granting degrees.

Additionally, it advises the university president on administrative personnel selection.

Please see SENATE on page 6.

Issues

Continued from page 1.

The budget would be at best a "maintenance budget," Johnson said, and at worst would require cuts. The difference between money the state provides and money that is required for an education for students increases annually. He added that increased student fees to substitute for state fees is "not doing a thing for students."

"Substituting student fees for state fees doesn't enhance the education of students. In budget matters, the state simply has not supported the costs of public higher education."

Closely related to budget problems, he said, are "too many disciplines at too high a price" and a shortage of classroom and office space.

Johnson said the budget has declined annually in terms of student reimbursement, purchase of equipment, and other forms of support, but that faculty positions have fared reasonably well. Many disciplines are facing technical demands not evident a few years ago, thus increasing costs. Such programs are suffering from a lack of attention by the state, he added.

"What it comes down to again," Johnson said, "is that the state is doing a terrible job of supporting us fundamentally. If it weren't for the money being raised on the outside by some deans and faculty, some disciplines would not be able to function."

Johnson said the university is literally out of office space, and clas-

rooms during peak hours are unavailable. Research space is also in short supply, but funds for construction and renovation, such as for Hardy Tower, were removed from the budget.

Faculty and administrative salaries are too low across the board. In some areas, the difference between what the state and the marketplace offers continues to grow, making the university unable to attract and retain qualified and desirable faculty.

"The differences in salary are especially critical in areas of high demand, such as computer science, business administration, engineering and math. In some of these areas we're not able to compete with the private sector at all," Johnson said.

He added that dean and administrative salaries are not competitive with other universities of SDSU's size and stature.

Johnson said another critical problem facing the Senate this year is advising and retaining students. The continual loss of a large percentage of students creates problems in getting the necessary full-time equivalents, which translate into university funds, he said.

Paying attention to the students currently enrolled is important and the faculty must be involved in advising and retaining students, Johnson said.

Other issues outlined by Johnson include methods of increasing graduate student enrollment, hiring more minority and women faculty and attracting international students.

The University Senate meets at 2 p.m. today in NE-60.

CSSA picks new liaison to trustees

The California State Student Association, the student lobbying group, selected Representative Lori Erdman to be a liaison between itself and the California State University Board of Trustees, a CSSA official said Monday.

Erdman, 26, a May 1983 graduate of Cal State Long Beach, was previously an administrative aide to Long Beach Associated Student presidents Jenny Oropeza and Izumi Hara between 1979 and 1981, said CSSA Legislative Director Curtis Richards.

Erdman ran against 12 other contenders, Richards said. Erdman has a "good, analytical mind" and has excellent communication skills, two reasons she got the job.

The new liaison, who will start work in two weeks, graduated with a bachelor's degree in political science. Erdman also held positions at Long Beach as a student assistant for the university's counseling center and American Indian Studies program and was an A.S. justice.

Play it, Sam

In the aftermath of the Police concert on campus, SDSU needs to ask: Was it worth it?
 The answer, for now, is "Yes."
 According to Joe Vasquez, director of administrative and business services, "we didn't spend a dime," and yet netted an estimated profit of \$50,000 through sales of concessions and T-shirts, and rental of the campus facilities. Not bad.
 Perhaps we have a goldmine. Perhaps we have a way to alleviate some of our financial pressures. Perhaps.
 There are bugs to be worked out. The Associated Students proved unable to handle the demand for concessions. Problems with parking and cleanup disrupted the flow of campus traffic for too long. Security was a problem.
 The first two problems are the sort of thing one expects in such an experiment. They are administrative problems that can be worked out in the near future, and probably without too much effort.
 Security is another matter. Chopping down trees, cursing at and bombing passersby with water balloons and fighting diminish the profitability of the concerts. Such acts bring shame to SDSU and undermine years of public relations efforts to improve all aspects of Aztec life by courting community support.
 SDSU is planning more concerts in the next year, and we applaud the effort. If future concerts prove to be as profitable, and if students can clean up their act, the university can look forward to a brighter future.

Letters

Gays should take the joke

Editor:
 On Friday, Sept. 9, I read an article in the *Daily Aztec* concerning comedian Rick Rockwell and his infamous joke about the construction worker in San Francisco threatening to beat the hell out of a gay person. To my surprise, the article continued to say that the Associated Students Council has issued a public apology and demanded an explanation from Rockwell.

Why is this necessary? Why do these homosexuals who are responsible for all this think they are so special that no one can even joke about them? Does Ronald Reagan demand an apology when Johnny Carson jokes about him on the *Tonight Show*? Of course not. Get serious out there all you bleeding-heart homosexuals and try and have a sense of humor.

At any rate, I was shocked to see that our A.S. Council and president allow themselves to be pressured into this ridiculous public apology by the Gay and Lesbian Student Union. I attended the A.S. Fest and was very

impressed by Rockwell's talent and humor and, therefore, would like to see him perform on campus again.

Richard A. Copelan
 geology

A.S. apology unnecessary

Editor:
 The demand for an apology from the Associated Students and Rick Rockwell to the morally estranged individuals who indulge in acts against God and nature is preposterous. In a free society, one has the right to express oneself in ways that carry on the ideas of the Constitution.

It would seem to me that the Gay and Lesbian Student Union is using this incident as a way to perpetuate its warped moral views. After all, can't anyone take a joke anymore? The homosexual community has been taking it up the "kazoo" so long that what's one more cheap shot? I think it was a direct contradiction of the principles of our Constitution for Chris Wakeman to yield to a group of publicity-starved moral degenerates.

Benjamin Dover
 health science senior

Nation turns back to God

Editor:
 A survey taken recently in a sociology class reflected well where we as a nation stand in our beliefs and convictions.

The result I found most interesting was that topics such as abortion, homosexuality, sex outside of marriage and pornography led the list of items of least importance. Sixty to 80 percent of the students said that these situations, conditions or behaviors were either a minor problem or no problem at all.

As a Christian I found this not surprising, but disheartening. We have taken pride, or even worse yet, comfort, in considering ourselves a "Christian" nation since the birth of our country. We have adopted an "easy believeism," a "Sunday morning" Christianity and have decided ourselves into a dreadful situation. We have forgotten and smitten our God. We no longer as a nation want to take a stand against unrighteousness and sin that the Bible points out so clearly. We would rather be comfortable with our dollars in our pocket that say, "In God We Trust,"

and not be bothered.

We are not doing anything that has not been done before. Just look at the last book in the Old Testament and you will find a nation in the same situation as we are. Go ahead and read of God's judgment of an unrighteous society, one that even has the right words and deeds but no change of heart. "If you do not listen, and if you do not take it to heart to give honor to My name," says the lord of hosts, "then I will send the curse upon you, and I will curse your blessings; and indeed, I have cursed them already because you are not taking it to heart. Behold, I am going to rebuke your offspring, and I will spread refuse on your faces, the refuse of your feasts; and you will be taken away with it." (Malachi 2:2,3) Not a pretty sight, but it is a sight to come.

Jim Dossett
 criminal justice senior

In need of comic relief

Editor:
 Your lead article on Sept. 9 ("Joke prompts A.S. apology") brings

attention to the fact that a certain minority segment of the student body has been offended by a comedian employed by the Associated Students.

I believe in a comic's right to exercise the First Amendment privilege of freedom of speech.

Once, Lenny Bruce was chastised for his use of profanity, while 15 years later George Carlin became famous for a skit on profanity.

Throughout history, many ethnic and minority groups have been attacked thusly by comics. We all seem to get our chances on stage.

Maybe we need a little less reaction on our parts and a whole lot of more good comedians.

Scott Pincus
 geologic sciences graduate student

Daily Aztec seeks letters

Letters should be type-written and double-spaced. All submissions must include the writer's name and major and are subject to editing for clarity and space.

Submissions should be brought to the *Daily Aztec* office, PSFA-361. For more information, contact Russell King at 265-6975.

Arms are matter of choice, not reaction

In the aftermath of the Korean airlines massacre, President Reagan has offered the American people a series of soothing words.

Appearing on television last week, Reagan denounced the act in the strongest words possible while offering no significant proposals.

None of this bothers me in the least. Reagan's advisers concede that the president can do little after the killing.

Some of the New Right hawks are calling Reagan weak because he has done little to the Soviets, but these people would believe that a nuclear war would be a manly, and moral, solution.

Of course Reagan could (and, in my opinion, should) have reinstated the Soviet grain embargo. But Reagan does not want to back down from the American farmer, even if it means looking weak to the Soviets.

Also, Reagan would be doing a flip-flop a

la Carter if he embargoed grain after lifting the embargo early in his administration.

So far so good. But in his televised speech last week, Reagan brought up one of his typically irrelevant comments.

The Korean air tragedy shows the need for the MX missile, Reagan said. Sure, hav-

ing the MX (or any other nuclear weapons system) would have stopped the Soviets from doing what they did.

Stephen J. Curran

ing the MX (or any other nuclear weapons system) would have stopped the Soviets from doing what they did.

If that is the case, why didn't our planned deployment of Pershing missiles in Western Europe stop the Soviets? Or our increased military presence throughout the world? Or the B-1 bomber and Stealth planes? Or the

Japanese government's willingness to raise their defense spending? And if we had the MX, would we have used it? Reagan seems to imply as much. Sunday's *Los Angeles Times* printed an editorial showing why the MX is the last thing America needs right now.

The Soviets are "in a state bordering on disorganization if not panic, a condition that seems to invite fresh efforts at arms control rather than the elaboration of controversial weapons systems that will encourage misunderstandings and fortify fears."

needs for its defense. Using the airplane downing as an excuse for throwing money at defense is not wise policy, nor is it logical.

The MX, the *Times* said, should be scrapped in favor of a truly defensive weapon, such as the Midgetman missile.

We must not waste our money on weapons we cannot afford. We must plan expense expenditures and make choices. We must choose which tank type to use and which bomber.

"Congress must choose between the B-1 and the Stealth. The nation neither needs nor can afford both," the editorial said.

We must spend our defense dollars wisely — and so far we have not.

"Congress now needs cool and careful decisions, guarding against the emotional heat inevitably aroused by so outrageous an act as the Soviet attack. Over-arming carries its own risks for national security."

Researchers hope to tap sun's energy

by Jim Trageser
Daily Aztec staff writer

SDSU solar-energy research may lead to free electricity in the near future, said Alan Sweedler, director of the interdisciplinary Center for Energy Studies.

Sweedler said researchers are experimenting with photovoltaic cells, which turn sunlight into electricity.

Although it costs about \$20,000 to equip a three-bedroom house with the photovoltaic cells, the prices of the equipment should drop, Sweedler said. This is because of advances made in the construction of the hardware and the feasibility of mass production of the panels.

"If prices (of photovoltaic cells) continue to decline as they have and, at the same time, the price of conventional electricity continues to increase, then it is likely that within two to five years photovoltaic systems will be quite common," Sweedler said.

However, for the photovoltaic solar-collecting system to become cost effective, it must be coupled with other systems of energy conservation and collection, he said. Among these would be passive and active solar heating.

Passive is the process of collecting solar energy through materials such as window glass or overhangs. An example of active solar heating is a solar water-heating system with pumps and a storage tank. Wind

power is also feasible in certain climates for generating electricity.

Sweedler said the major obstacles to the widespread use of this system are economic and not technological. The two determining factors are the local price of utility-supplied electricity and the amount of sunlight available.

San Diego's unusually high energy rates and generally sunny climate could cause it to be the first in the country to see a boom in the use of the systems, he said.

The technology is an outgrowth of the National Aeronautics and Space Administration space program. Sweedler said that if it were not for the program, the equipment would

never have been developed because it was a way to generate electricity onboard space craft.

The Center for Energy Studies is also working on a project with the Cerro Prieto Geothermal Facility near Mexicali in Baja California. The facility will use geothermal energy to generate electrical power, some of which will be sold to San Diego Gas & Electric.

The center has also participated in energy-feasibility studies with the San Diego Association of Governments, as well as studies in Mexico and Brazil.

One of the projects that Sweedler expressed the most pride in was a special "Energy Collection" in Love

Library. It consists of about 5,000 volumes and a newsletter, *Update: Energy Resources*. He said it is invaluable in research of energy projects and is one of the best resources in the American Southwest.

Sweedler is overseeing the establishment of an interdisciplinary energy studies minor. It is tentatively scheduled to be offered in fall of

1984.

Sweedler has been designing, building and installing the photovoltaic systems on test units supplied by the McMillin Development Corporation. He credits Jess Green, Will Cronyn and Anthony Tirado with helping on the project. The research has been done in conjunction with the California Energy Commission.

Power

Continued from page 1.

To prevent spoilage, food was put in generator-operated freezers. Larry French, a consultant for the Social Science Research Laboratory, said the outage disrupted classes and caused computer terminals to go down.

"I think there was a power surge and (the terminals) got too much power," he said. "There's a possibility they are damaged."

French said the computers emitted a loud, high-pitched sound, and a line crossed the screens before they terminated.

Several classes moved to Scripps Cottage because of poor lighting, said Douglas Coe, laboratory coordinator. The laboratory houses about 30 terminals.

"It made it kind of hard to breathe and teach in here," Coe said.

***\$29.00 STUDENT SPECIAL**

A.S.

Continued from page 1.

"The first thing a student should do before they drop a class is see a counselor," Karney said. "Right now there's hardly any way to see a counselor in the first few weeks of school, so how are students to be sure they are making the right decision?"

"The problem is especially bad for freshmen. If the drop period is shortened it will only make them more confused as they try to figure out how the system works."

Karney added that many students decide after four or five weeks into the semester that they don't want a class and stop attending. This gives the student an F or U grade as well as deprives another student of space in the class.

The solution is to give the students an adequate amount of time to decide

if they are going to stay in a class while letting the instructor know as soon as possible so he can admit or drop them from the class, he said.

Wakeman said the issue of remedial education on campus is of concern to him and the other representatives. He is supportive of retaining some form of remedial education for those students who need it.

"I think there is a great enough need on this campus to warrant providing remedial education," he said.

Regarding budget problems, Wakeman said the A.S. faces not being able to do a lot of pro-active things to determine its outcome.

However, budget cuts have had similar effects on both students and faculty, and because of that, the two groups are more sympathetic to each other, he said.

"As students are paying more and getting less, teachers are being asked to do more and getting paid less," Wakeman said.

Although one method being considered by A.S. to maintain the quality of education at SDSU is to generate long-range sources of funding, a program of that magnitude is "not something you do overnight," he said.

Other areas of student concern that possibly will be brought up in the Senate are maintaining competitive

faculty and administrative salaries, a shortage of classroom space and the problem of retaining and advising students, Wakeman and Karney said.

Wakeman concluded that A.S. is still outlining its goals and priorities for the year, but the overriding theme is one of working together with the Senate for a quality education for SDSU students.

"We aren't trying to save only our own piece of the pie," he said. "We're trying to work together to save everyone's piece of the pie."

Sept. 19 last day to make class change

Only five more school days before add/drop forms are due.

The final deadline for add/drop forms is Monday, Sept. 19. Forms are available from the tables on the east side of Love Library.

Students must take formal action to drop classes they will not attend.

Anti-pot campaign brings arrests, destroys plants

SACRAMENTO—During its first three weeks, the Campaign Against Marijuana Planting has resulted in the destruction of more than 20,000 marijuana plants and the arrests of 46 people for the cultivation of marijuana for sale, Attorney General John K. Van de Kamp announced this week.

Raids during the third week of the campaign resulted in the seizure and destruction of 9,441 plants, almost as many as the first two weeks combined, he said.

CAMP is a coordinated effort involving federal, state and local agencies to locate and destroy marijuana cultivation sites in 14 Northern Cali-

fornia counties and to arrest and prosecute the growers.

During the first three weeks, the CAMP program has raided 157 marijuana cultivation sites in 11 counties. The campaign is expected to continue until the end of the cultivation season in mid- to late October.

"We expect this program to put a

very significant dent in the supply of California-cultivated marijuana," Van de Kamp said. "At the same time, it should also give us a realistic picture of just how big the marijuana cultivation problem is in California."

"Up to this time, all the figures on marijuana growing in the state have been little more than conjecture."

Senate

Continued from page 1.

It also is responsible for maintaining adequate communication between the faculty and the administration.

Membership on the University Senate comprises two groups: ex-officio members and elected members.

Ex-officio members include the university president, the vice president for Academic Affairs, and the deans of the Division of Undergraduate Studies, Graduate Division and Research, College of Extended Studies and Student Affairs.

The Associated Students president and three other appointed students, two staff members and two temporary faculty members round out the ex-officio membership.

The elected members are full-time faculty members and come from each college on a ratio of one senator for each 25 faculty members assigned to the college. The term of a senator is three years.

The electorate consists of all full-time faculty members and all full-time counselors and librarians.

The key committees of the Senate include the Executive Committee, the Curriculum Committee, the Personnel Committee, the Committee on Academic Budgeting and Planning and the Committee on Academic Policy and Planning.

The policy file is the compilation of all permanent policies and regulations adopted by the Senate and approved by the president.

For a proposal to be included in the policy file it first has to be accepted as meriting the attention of the Senate by the Senate Executive Committee. The Executive Committee generally refers the matter to appropriate committees that formulate recommendations for the Senate.

Council will discuss State parking issue

The College Area Community Council will be meeting 7 p.m. Wednesday in the College Park Presbyterian Church, 5075 Campanile Drive.

Working for a petition that asks for residential parking only in SDSU neighborhoods is scheduled for discussion.

Dream come true keys Aztec win

DREAMER—SDSU outside linebacker Thomas Carter looks to halt the progress of a California ball carrier. Carter dreamt Thursday night that he would intercept a pass and return it for a touchdown against the Bears. He did just that in the second quarter of the Aztecs' 28-14 victory over Cal.

by Steve Perez
Daily Aztec sportswriter

SDSU outside linebacker Thomas "TC" Carter was shouting in the Aztec locker room, but not just because he was excited. It was also in order to be heard over the whoops and shouts of his teammates following their victory over the California Golden Bears.

The subject was his interception that resulted in a touchdown.

"It was fantastic," Carter said. "To be honest with you I dreamed that play. I dreamed it two days ago."

Scenes it was late Thursday evening before the game, and Carter, a senior, was having trouble sleeping.

"I woke up about four o'clock in the morning after going to bed Thursday night, and I went to get a drink of water," the Aztec co-captain said. "I came back trying to go to sleep and all I could get was just football plays. Players were coming at me in my sleep."

Of such stuff, nightmares are usually made. However, Carter's vision approached the realm of fantasy.

"In my dream, I caught an interception, and I ran it back for a touchdown," Carter said matter-of-factly.

Let the record show that on Saturday, Sept. 10, with the score tied 7-7 and 3:28 remaining in the second quarter, Carter made his dream come true.

In reality, what transpired may have been even better. The ensuing play would leave the Aztecs with a 14-7 lead at the end of the first half.

Carter intercepted a Gale Gilbert pass after stepping in front of a Bear receiver near the Cal 28-yard line. His return for a touchdown helped key what was to be an eventual 28-14 upset over the Pac-10 team.

A touchdown to a quarterback, running back or receiver is expected, but to a defensive player a touchdown is, well, a dream come true.

"I dreamed it," Carter said. "I dreamed that play."

And who's to doubt that? When the 6-foot-2, 225-pound Carter, also known as "Mean Man," tells you he dreams something, you believe.

For Carter, the Cal game was payback time. Last year, the Bear's All-America offensive tackle Harvey Salem spit in his face during a 28-0 drubbing. Salem is now starting for the NFL Houston Oilers and presumably keeping his expectorant to himself. But his former teammates had to endure domination at the hands of a fired-up Aztec defense led by Carter.

"I thought he played a great game," SDSU Coach Doug Scovil said. "He gave us great leadership on and off the field. We're really happy with Thomas."

Carter and fellow linebackers Jack Eaton, James Johnson, Herb Brohn et al, played superbly, combining with fine line play to hold the Bears to just 23 yards rushing.

"The linebackers put a lot of pressure on the passer when we called them in to stunt," defensive coordinator Burnie Miller said.

"San Diego State came out and wanted revenge," said Cal Coach Joe Kapp, who this time had no miracles to save the day. "They came out and took it to us."

Please see CARTER on page 9.

Cross country's Crisp makes running a snap

by Karen daSilva
Daily Aztec sportswriter

Somebody knew about Laurie Crisp before she was even born. They knew what she'd be like, and they knew what to expect.

So they wrote a song about her. It turned out to be a popular hit.

"Five foot two, eyes of blue, has anybody seen my gal?" the song went.

Along with being a 5-2, blue-eyed blonde, Crisp is a distance runner who sometimes runs up to 14 miles a day. At times it can be pretty difficult to catch sight of her.

In fact, last year at the first few meets, the Aztec cross country coaches were singing her song.

The problem wasn't the SDSU coach's eyesight, it was their expectations. Crisp, who transferred from Modesto Junior College, was flying past all their preconceived ideas and turned out to be the No. 1 SDSU distance runner.

In her Aztec debut, the UCLA In-

vitational, Crisp went out in good position and, with 440 meters to go, put out on a strong finishing kick to pass UCLA's Michelle Bush and take second behind UCLA's other dominant distance runner, Polly Plumer.

"I was there, and it was a pleasant surprise," said interim women's cross country Coach Jim Cerveny of Crisp's UCLA performance.

"Laurie got out there in good position and hung it to them," he said.

"I beat Michelle Bush," Crisp said. "She's the only runner in the country who they schedule meets around."

Because of her religious beliefs as a Seventh-Day Adventist, Bush cannot participate in any athletic event taking place between sundown on Friday and sunup on Sunday.

In her second race, Crisp again finished first for SDSU. But it wasn't until after her third race of the season, when she came from behind to out-stride teammate Debra Chad-dock with 50 yards to go and take

place first, that she firmly established herself as the Aztecs' No. 1 distance runner.

Crisp came to SDSU because "I wanted to go somewhere where I could run on the beach."

San Diego beaches began to look better than Santa Barbara's after Crisp talked to UCSB's coach and found that "she really didn't know her stuff."

Then, after some prodding from two-time All-American Carrie McLaughlin, a junior high school friend who recommended SDSU's program, Crisp took off for San Diego.

"We were a couple of stunt-heads back then," Crisp said.

A combination of speed, endurance and mental strength is what's needed to catch up to Crisp. Qualities few people possess.

And those that don't, well they can be heard singing her song, but with their own ending version of "my gal."

"She's a go-getter," Cerveny said of Crisp. "She just says, 'Hey, I'm running,' and there she goes."

"She has a strong mind, and (being short) is not a disadvantage."

In some ways Crisp regards her height as an advantage. "It goes curvy-curvy," Crisp said of cross country courses. "And for little short people, you can elbow somebody. I've beaten a lot of tall girls."

Please see CRISP on page 9.

Daily Aztec photo by Ian Tapp

STAYING IN STEP—Laurie Crisp, currently the No. 1 runner on the SDSU women's cross country team, is shown running in Balboa Park in preparation for the upcoming season. Crisp, a senior, will lead the Aztecs in their first meet Sunday at Los Angeles in the UCLA invitational.

Players-only meeting inspired gridgers for conflict with Bears

Go ahead and try to figure the 1983 Aztecs so far.

First, they're whipped rather handily by the Tulsa Golden Hurricane, 34-9, then they produce an inspired 28-14 win over the California Golden Bears.

Following the season-opening loss, Coach Doug Scovil assured the public his team was much better than they demonstrated in Oklahoma two weeks ago.

It might be something the team also realized. Thursday evening before the Cal game, Aztec co-leaders, center Matt Long, quarterback Mark

McKay and linebacker Thomas Carter, organized a team meeting that many credited with helping the team "come together" for the home opener.

"We were fired up for this game," sophomore linebacker Jack Eaton said. "We kind of embarrassed ourselves last week. This week we just told ourselves we were gonna get up for it, so we had a team meeting."

The 45-minute "bitch-session" afforded team leaders the opportunity to talk frankly to other players without being under the watchful eye of coaches.

"We really got ourselves together and got ourselves fired up," Eaton said. "And we were ready to go. We needed to pay these guys back from last year."

Before the start of the season, Scovil said his squad had a good attitude, judging by the enthusiasm they brought to their summer practices. "The constructive team meeting could be viewed as yet another manifestation of an improved team attitude."

"It brought us closer together as a team," Eaton said. "We just told ourselves that we needed to go out and do it. But we need to keep the momentum going."

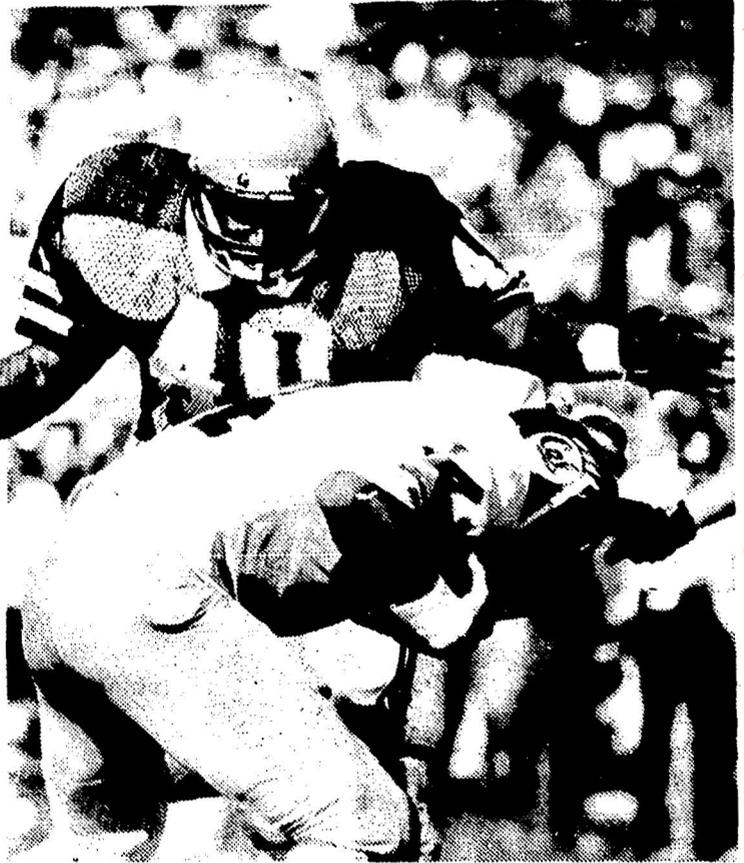

Co-captain Thomas Carter wouldn't give many details about what he talked about during the meeting.

"We just needed to clear up a few things," he said.

But as long as the results are the same, linebacker coach Mike Smith doesn't care.

"Whatever he said, I hope he says it every Thursday," Smith said. "Because they came out and played a whale of a ballgame."

— Steve Perez

Daily Aztec photo by Ian Tapp

UNINVITED GUEST—Aztec linebacker Darrell Brown swoops in to sack California quarterback Gale Gilbert during Saturday's game. The SDSU players had a team meeting Thursday that served to fire up the defense, which limited the Bears to two touchdowns and just 23 yards rushing.

Rainbows reign over Colorado

Hawaii blew out Colorado State, 34-0, Saturday in Honolulu to open its season and WAC slate on a winning note. A crowd of 43,266 watched the Rams fall to 0-2 on the season and in the WAC.

Hawaii quarterback Raphael Cherry threw three touchdown passes to lead the Rainbows. Cherry tossed scoring strikes of 16, 10 and 47 yards in the first half.

Aztec Sports Department wants letters

What's your opinion on issues relating to the world of sports?

The Daily Aztec sports section accepts letters from students, faculty, staff and alumni. Submissions should be typed and double-spaced if possible. They should also include the name, class and major or position at SDSU.

Letters can be dropped off at the Daily Aztec editorial office, located at PSFA-361, or mailed to Daily Aztec Sports Dept., San Diego State University, San Diego, CA 92182. For more information, telephone Kirk Kenney at 265-6979.

Colorado State at Colorado
Air Force at Wyoming
Bowling Green at BYU
New Mexico at Arkansas
Baylor at UTEP
Long Beach State at Hawaii

Carter

Continued from page 7.

There's one thing Carter, a native of Valencia, Calif., probably didn't dream of when he started his college football career — playing for the Aztecs. He originally lettered at the University of Wyoming as a freshman before transferring here and sitting out the 1980 season.

But in 1981, a knee injury in the season's third game caused him to miss the rest of that year. Last season, Carter played mostly with the second unit. This year, though, he's a starting linebacker and an acknowledged team leader.

Linebacker Coach Mike Smith credits Carter with performing quite a turnaround from last season.

"Right now, Thomas is probably the most improved player from last year attitude-wise and athletic ability-wise," Smith said. "He's really put his mind to working hard. He stayed here all summer, hit the weights and ran, and it shows. He was elected one of our team captains, which is quite an honor for Thomas.

"He's very boisterous and gets them (the players) going when we're having a poor practice. He is the leader right now on defense. He does his talking with his pads most of the time."

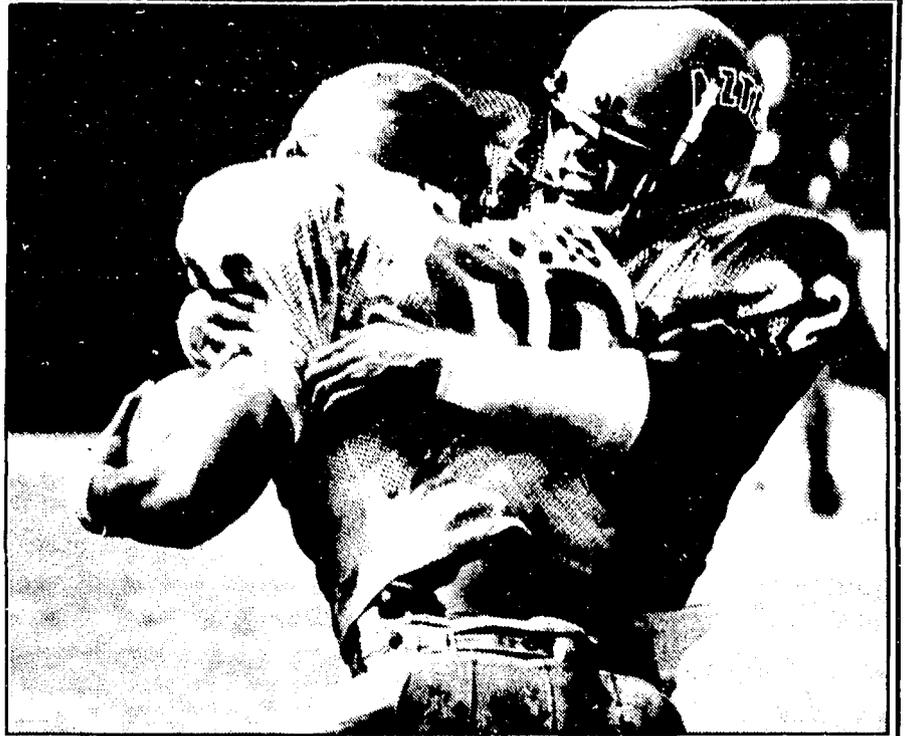

Coach Doug Scovil said, "Carter's interception gave us a great spark." He spoke of the 22-year-old Carter in glowing terms, praising the athlete's "great" leadership abilities.

"He says it like it is," Scovil said. "He's not bashful. If he thinks somebody is goofing off, he's going to tell them right then. He doesn't back down on it, and he does what he's supposed to. He can say that because he really busts his butt in practice."

Junior inside linebacker Darrel Brown, who along with safety Trent Collins knows him best, said Carter's enthusiasm can be contagious.

"He's the type of person you love to be out there on the field with," Brown said of the San Fernando High School graduate. "If you've ever been out there and felt like something was going to go wrong, you could look at Thomas and know it was going to work out. He's that type of person; he's always got his head into the game."

One hopes that for the Aztecs, Carter will use his head to dream up a few more big plays this season.

Daily Aztec photo by Tom Riggs

BEAR WRESTLER—Safety Trent Collins attempts to wrestle California tight end David Lewis to the ground. Collins, one of SDSU linebacker Thomas Carter's closest friends on the team, is just one of many Aztec defenders that benefit from Carter's on-field leadership.

Crisp

Continued from page 7.

"I can vouch for that," former teammate Chaddock said.

For all her accomplishments last year and in the past, Crisp still doesn't necessarily consider herself the No. 1 Aztec distance runner.

"You never know," the SDSU senior said. "Some little freshman can come out and whip my ass."

According to Cerveny, Crisp's main competition for the No. 1 position on the cross country team this year won't be from freshmen. Juniors Stacy Kneeshaw, who was among the top five scorers for SDSU last year, and Kim DeVitas, who won the California JC cross country championships last year, will be vying for Crisp's position.

Laurie Crisp

"Laurie's in much better shape (now) than she was in track season," Cerveny said of Crisp's chances to stay No. 1.

This Sunday at the UCLA Invitational, Cerveny will get a good idea of who will be where.

Crisp, meanwhile, returns to the course where last year she began establishing herself as the No. 1 Aztec distance runner.

According to Crisp, the UCLA course "has this long downhill. It's real good for the butt muscles. I had to sit on a block of ice after that downhill."

Crisp finds cross country "more adventurous and mentally more fun" than track. Her goal this year is to make it to the nationals.

"I have a better than slim chance," she said. "But to me it's worth shooting for."

Then after her final year, Crisp will try her hand at triathlons.

A new theme song could be in the making for Crisp.

Event to commemorate Chilean revolution

A poetry reading in English and Spanish at noon today will begin a three-day event to commemorate the 1973 revolution in Chile.

"For Neruda, For Chile: Poetry from and about Pablo Neruda," will be presented in Scripps Cottage by three SDSU professors.

This week's activities, sponsored by various SDSU cultural organizations, will appraise the last 10 years of military dictatorship in Chile and its effect on the society, politics and culture of the Chilean people.

The event will include audio-visual presentations, poetry read-

ings, folk art exhibits, lectures, discussions and a musical presentation.

Also today at 7 p.m. a videotaped speech by Salvador Allende titled, "Universidad Comprometida", will be presented in Spanish in the Aztec Center Council Chambers, followed by a discussion.

To portray what has been happening in the country since 1973, Cecilia Ubilla, a member of Chile Democratico, will present samples of folk art at noon, Wednesday, in Casa Real, Aztec Center.

Following the folk art presentation "Obligations I," a videotape ex-

plaining the role of international finance in supporting the military dictatorship will be shown at 1 p.m., also in Casa Real.

At 7 p.m., Wednesday, a recent videotape on the Chilean military will be presented in Aztec Center rooms C, D, E and F.

Events on Thursday will include a

presentation by Professor of Political Science Brian Loveman called "The U.S. and Ten Years of Dictatorship in Chile." He will speak at noon in Casa Real.

Contemporary Chilean Poetry, readings by Chile Democratico members Maggie Jaffe and Robert Jones, will follow.

At 3 p.m. in Scripps Cottage, author Frederick Nunn will discuss the Chilean military in a lecture titled, "Chili: Ten Years After."

The three-day event will close at 7:30 p.m. with a selection of Chilean songs performed by the musical group Cocharcas in the Backdoor.

Cost of attending college going up throughout U.S.

(CPS) — "People pay tuition because they feel it's worth it," explains Suzanne Horne, an engineering major at the Massachusetts Institute of Technology.

"People pay because they're slightly weird," said Barry Surman, editor of MIT's student newspaper.

Weird or not, MIT students will pay \$900 more in tuition than last year's \$8,700, a 10.3-percent hike. When books, fees and other costs are added, Horne and the others will

spend a total of \$14,500, making MIT the most expensive school in America, according to the College Scholarship Service's annual survey.

But all colleges are more expensive this year, as campus inflation remains frighteningly high despite the taming of inflation elsewhere in the economy.

For example, while the nation's inflation rate over the last year has varied from 2.6 percent to 4.8 percent (depending on which federal

agency is counting), four-year public college costs have soared 12 percent (to an average \$4,721), the CSS said.

Four-year college costs are up 11 percent, to an average \$8,440.

Community and junior college students will spend an average \$3,400 in 1983-84, an 8-percent increase.

The increases, moreover, follow even larger hikes last year. In all, 1982-83 college costs were 20 percent higher on public campuses and 13 percent higher in private campuses than 1981-82 costs, the CSS reported last year.

At the same time, the Consumer Price Index rose by 7.7 percent. The 1983 inflation rate is 3.2 percent so far, according to the U.S. Department of Labor.

Terminal

Continued from page 1.

San Diego Transit believes increased visibility of the bus system means more riders and better bus service. The terminal's centrality eliminates walking to campus from nearby bus stops, as all routes that pass through the college area will make stops at the terminal.

Ralph Thielicke, senior transportation specialist for San Diego County, said the transit center is part of a region-wide plan to optimize the ease of transferring between bus routes.

A transit center was already completed in Fashion Valley shopping center and construction has begun for transit centers at University Towne Center and in El Cajon on Marshall Avenue. A fifth center serving the Point Loma area is in the planning stages. San Diego Transit plans to build six or seven transit centers throughout metropolitan San Diego.

Price said the SDSU center will provide shelter, benches, telephones, bus schedules and route maps. It will have facilities for six different routes with exclusive boarding areas for each. The total cost includes moving the Wesley Foundation.

The transit center will serve: Spring Valley (route 11); Southeast San Diego (routes 13 & 105); Allied Gardens/Grantville (route 13); Lemon Grove/College Grove (route 36); Mission Beach/Pacific Beach (route 80); University Towne Center/Clairemont (route 105); El Cajon Boulevard/North Park (route 115); and Old Town/Downtown San Diego (route 105).

Sources did not agree on when construction and service will begin. The date for construction to begin ranged from 60 days to one year, the date for service to begin ranged from spring 1984 to fall 1985.

'Gandhian Non-Violence' lecture set

"Gandhian Non-Violence" will be the topic of a free public lecture 7 p.m., Friday, Sept. 23, at the College Park Presbyterian Church, 5075 Campanile Dr.

The Friday lecture is part one of a two-day workshop on Gandhian Non-violent Direct Action. Part two of the workshop is "Training for Non-violence Trainers."

The purpose of the workshop is to prepare people to train others for Non-violent Direct Action, emphasizing the philosophy of Gandhian Non-Violence as more than simply a

technique.

The training session will be held from 9:30 a.m. to 4 p.m., Saturday, Sept. 24, at the church. There is a \$2 fee for attending; pre-registration is required.

workshop are required to attend Friday's public lecture as part of the training.

For more information, contact the Peace Resource Center of San Diego, 265-0730.

Chacon blasts JC tuition plan

SACRAMENTO — Minority students will be the hardest hit by a proposed \$50 community college tuition, said Assemblyman Peter Chacon, D-San Diego.

In a press conference last week, Chacon and other members of the Hispanic Legislative Caucus blasted Gov. George Deukmejian's proposal for a \$50 tuition for community college students.

Chacon instead called for a guarantee of continued tuition-free higher education.

Chacon, a former chairman of the Hispanic Caucus, told reporters that the tuition proposal would hit hardest at minority students.

"Fully 85 percent of minority students who attend college in California are enrolled in community colleges. In addition, demographic studies

indicate that by the year 2000, people of Hispanic descent may make up 50 percent of California's population," Chacon said.

"To do anything less than encourage in every way possible a complete education for all minority students will be to possibly create a permanent underclass of citizens in this state," he said.

Chacon said that he was also concerned about the future of California's economy.

"We are used to being the leading economic force in this nation, but if we are not providing the basic tools to half our citizens, we cannot long hold that position of leadership."

Chacon said he was disheartened by the administration's lack of willingness to negotiate this and other issues of importance to minorities.

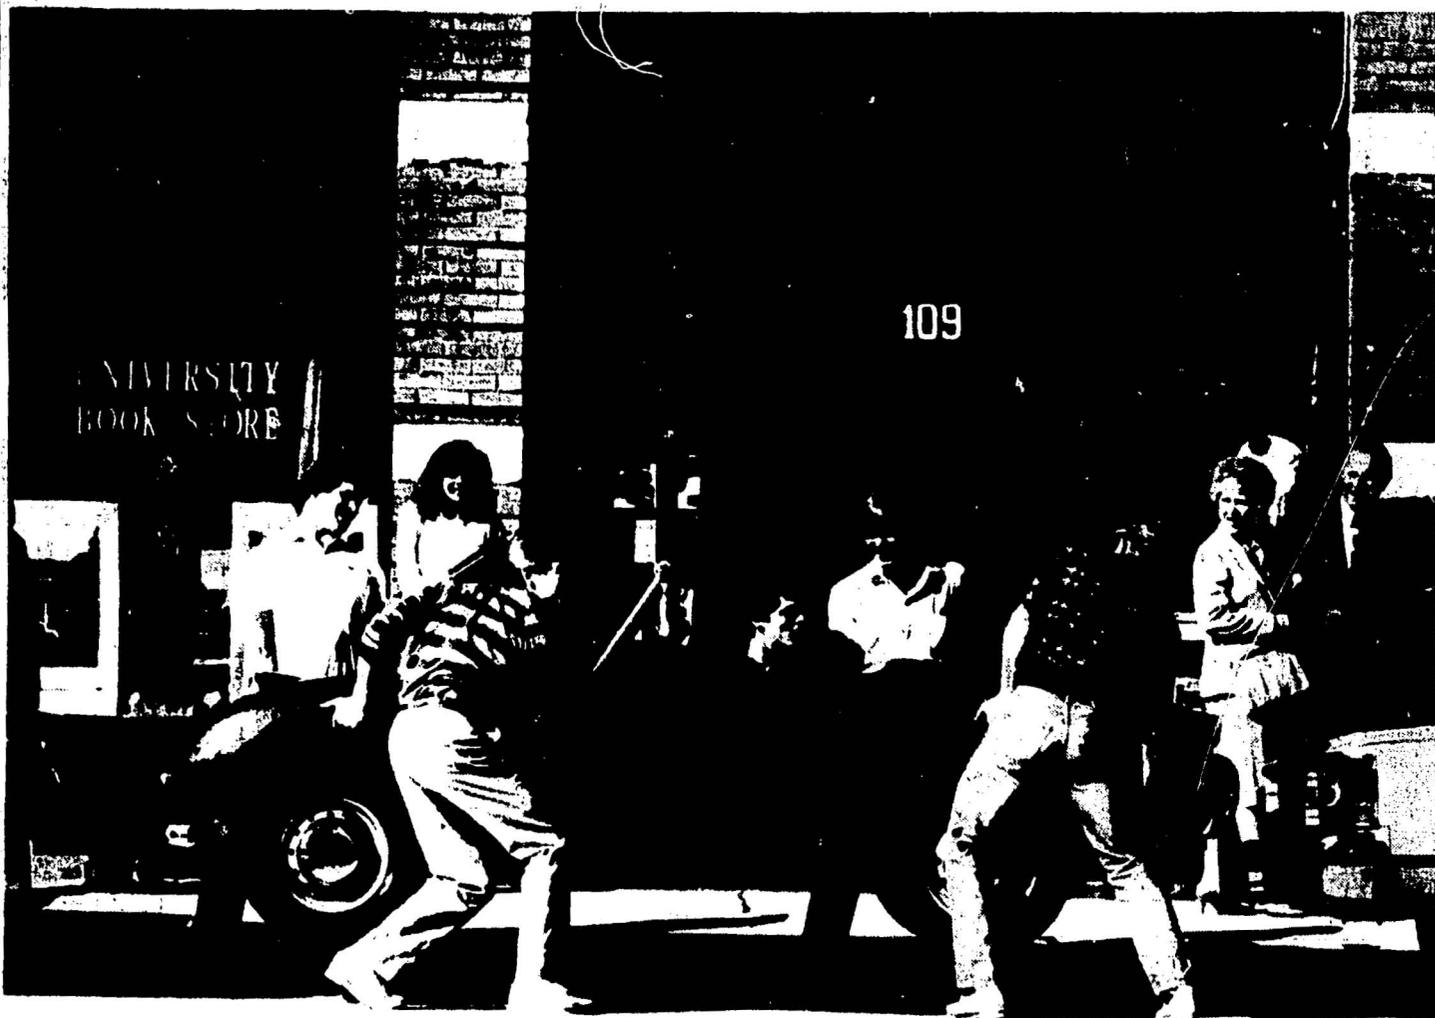

"We've been hearing a lot lately about how

sensitive Republicans are to Hispanic needs in an attempt to woo minority voters to their candidates," he said. "But when a real issue comes up of significance to minority communities, the Republicans head for the hills."

"The fact is that, looking over the blue-penciling done by the Governor on the budget we gave him, it is clear that the overwhelming amount of cuts have the greatest impact on poor and minority people," he said.

"The Hispanic Caucus and most Democrats are calling on the Governor to come forth with a real proposal to insure the stability of the community college system and that poor and minority students will continue to have complete access to that system," he said.

When you're in a tight spot, good friends will help you out.

When you pulled in two hours ago, you didn't have this problem. And with a party just starting, the last thing you wanted to do was wait around another two hours.

Neither did the rest of the guys. So when they offered to give you a lift, that's exactly what they did, proving not only that they were in good shape, but that they were good friends.

So show them what appreciation is all about. Tonight, let it be Löwenbräu.

Löwenbräu. Here's to good friends.

Three \$1,000 scholarships being offered

Three \$1,000 scholarships are being offered through the Scholarship Research Institute of Washington, D.C., an organization specializing in aiding students looking for college funds.

Applicants must be full-time, undergraduate students with GPAs of 2.0 or higher.

Recipients will be selected based on their academic performance, leadership abilities, and college and community activities. The application deadline is Oct. 30. Awardees will be notified by Dec. 15.

For applications and information, students should write to Scholarship Research Institute, P.O. Box 50157, Washington, D.C., 20004.

These awards are for the Spring Semester of the 1983-1984 school year and may be used for expenses related directly or indirectly to the pursuance of any academic major at the undergraduate level.

Peace Corps representatives to be at SDSU

Peace Corps representatives will be on campus from 9 a.m. to 4 p.m. on Sept. 26, 27 and 28.

The representatives will have a table on the Campus Lab Lawn and will talk to students who want information about the Peace Corps.

At 10 a.m. and 2 p.m. on Wednesday, Sept. 28, a film about the Peace Corps will be shown in Aztec Center.
